

Acceptance Testing

UAT Execution & Report Submission

Date	01 October 2026
Team ID	6ab61594fa5e5219dc387253
Project Name	Import Data using Transform Maps
Maximum Marks	4 Marks

1. Purpose of Document

The purpose of this document is to explain the test coverage and open issues of the Import Data using Transform Maps project at the time of release to User Acceptance Testing (UAT). The testing focuses on importing source data through an Import Set, mapping fields using a Transform Map, handling duplicate records using Coalesce, validating data, and verifying the target records.

2. Defect Analysis

This report shows the number of defects identified during UAT and their current resolution status.

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	0	0	1	0	1
Duplicate	0	0	1	0	1
External	0	0	0	0	0
Fixed	0	1	2	1	4
Not Reproduced	0	0	0	0	0
Skipped	0	0	0	0	0
Won't Fix	0	0	0	0	0
Totals	0	1	4	1	6

3. Test Case Analysis

This report shows the number of test cases that have passed, failed, and remain untested for the major functional areas of the Transform Map import process.

Section	Total Cases	Not Tested	Fail	Pass
Source Data / Import Set	5	0	0	5
Transform Map Configuration	5	0	0	5
Field Mapping & Coalesce	4	0	0	4
Data Validation	4	0	1	3
Reference Field Handling	3	0	0	3
Target Record Verification	4	0	0	4
Error / Exception Handling	3	0	0	3
Security / Access Control	2	0	0	2

UAT Summary: The Transform Map workflow was tested across source data loading, field mapping, duplicate handling, validation, reference fields, target verification, exception handling and access control. Most planned test cases passed; one validation case requires correction before final acceptance.

4. Exception Reporting

Exception / Issue	Status	Action
Invalid or missing source field	Open	Validate source data before transformation
Duplicate record detected by Coalesce	Resolved	Verify Coalesce field mapping
Reference field mismatch	Resolved	Verify referenced user/department value
Transformation error	Resolved	Review transform log and mapping

5. Final Report Output

The final UAT output confirms that the Import Data using Transform Maps process can accept source data, load it into an Import Set, transform and map the records into the target table, apply duplicate handling through Coalesce, and verify the resulting records.

Metric	Result
Total UAT Test Cases	30
Passed	29
Failed	1
Not Tested	0
Open Issues	1

6. Version Control

Version	Date	Description
1.0	01 October 2026	Initial UAT report for Import Data using Transform Maps
